

Student assistant as developer in the area of Data Science (m/f)

THI Investments is a single-family office that manages the assets of a wealthy family and acts as a global investor. The investment strategy is comprised of private equity and capital market investments, which are developed and implemented by THI's teams.

The THI team would like to strengthen itself with a student assistant (m/f) as soon as possible. The successful candidate will support the THI Investment Strategy team in the head office in Stuttgart.

This is a unique opportunity to become part of a top-class team in an entrepreneurial environment within an influential investment house.

Responsibilities:

- Modeling and development of a search algorithm to collect metadata from the market landscape
- Filtering founded data based on predefined rules
- Visualization concept of data collection
- Integrating the approach into our already existing toolchain
- Developing Dashboards to visualize the different project status
- Contribute in process modeling

The ideal candidate will be/have;

- Capable of working efficiently in a fast-paced environment
- Coding skills: R, Web-Development (JSON, TypeScript, CSS), MatLab, Python, Java
- Database knowledge: MySQL, Oracle, etc.
- First skills in cloud development (Amazon Web Services, Microsoft Azure)
- First knowledge in Maschine Learning, Data Mining, and Knowledge Discovery
- Good study in "Computer Science", "Mathematics" or a similar course of study.
- First knowledge in procedure models like SCRUM, KANBAN, Waterfall, XP, Design Thinking, etc.
- First knowledge in procedure toolchains like Office365, Atlassian Confluence & Jira, etc.
- Ability to learn new methods quickly
- Highly structured
- A team player with the ability to work independently
- A professional and effective communicator across all levels of seniority
- Native German and fluent English language skills required

We offer:

- An entrepreneurial environment which allows pursuing own ideas and enables the significant potential for personal development
- Flat hierarchies that provide insights into the entire company and allow to work closely with the top management
- A fascinating and family-type atmosphere with an office located in the heart of Stuttgart
- A competitive salary that rewards performance
